

Melbourne Open Science Workshop

The Melbourne Open Science Workshop is a free full-day event on the 19th of July at Inspire 9 in Richmond.

The aim is to bring together researchers and scientists and teach them about the best tools and approaches to open science - it will help make scientific work more reproducible, freely available and encourage effective collaborations between different fields.

Specifically we will learn about:

- Source control using Git and Github, and,
- Collaborative programming using the SageMathCloud.

Audience	Researchers/Scientists/Students
What	Learn about open science and open source tools
Where	Inspire 9, Level 1/41 Stewart St Richmond (50 meters from Richmond station)
When	19th of July, 2014 (a Saturday) from 9:30am until 5pm (Lunch provided)
To bring	A laptop
